

TAMTRON

WEIGH TO KNOW

TAMTRON ONE CLOUD

EASY ACCESS TO MORE PROFITABLE BUSINESS

Secure weighing information management solutions support all parties in business arrangements. With reliable and accurate weighing information, you gain the benefits of a faster work flow, more transparent trade and business, and significant cost savings.

The reporting and analysis features enable you to facilitate invoicing and expedite work.

TAMTRON ONE CLOUD

WEIGHING INFORMATION IN YOUR POCKET 24/7

In the Tamtron One Cloud, weighing information remains easily available for use and distribution to all different parties within the company, including partners, where necessary. By analysing the accumulated information, you can increase the efficiency and fluency of your company's operations. Tamtron One Cloud is data secure and easy to use.

YOU CAN CHOOSE BETWEEN DIFFERENT SERVICE LEVELS:	
One Cloud Light	One Cloud
<ul style="list-style-type: none">▶ automatic software updates▶ remote access	<ul style="list-style-type: none">▶ send orders directly to the scale▶ transfer the weighing information from the scale to One Cloud in realtime, enabling invoicing immediately after weighing▶ access to the weighing information anywhere at any time (24/7)▶ web user interface for easy data access▶ create custom reports and sum reports

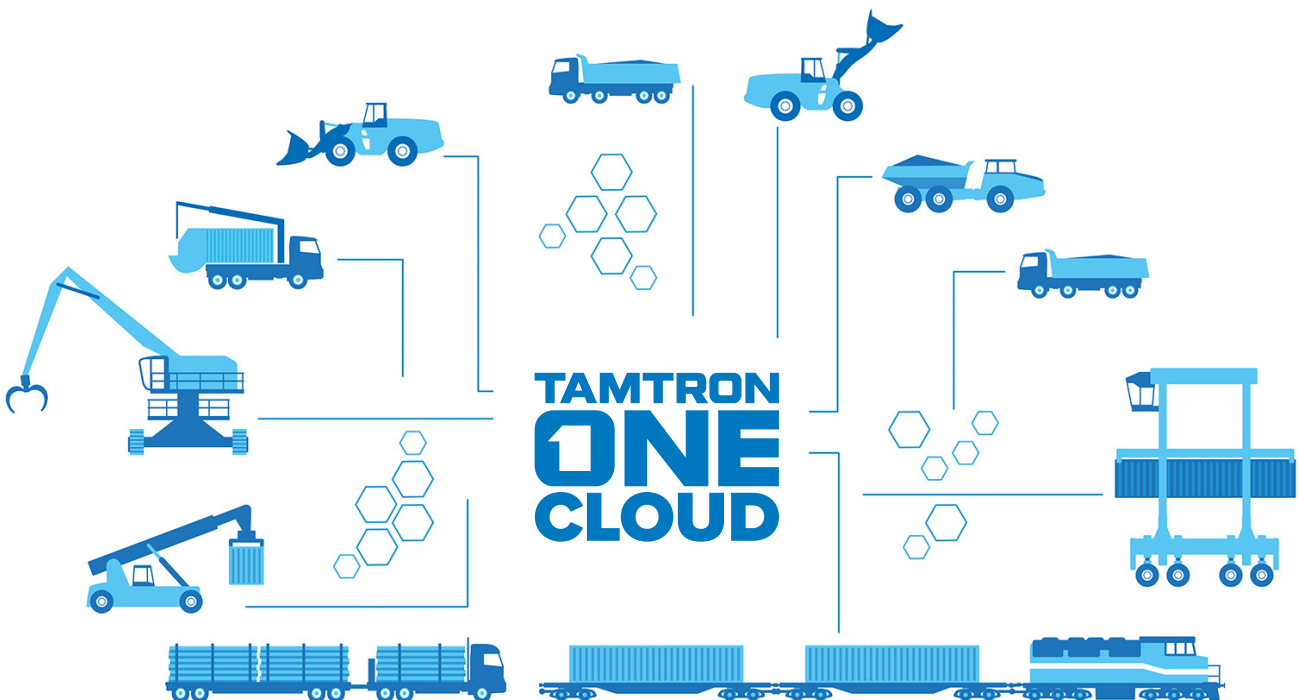

The Tamtron One Cloud can be used to keep an eye on the big picture. For example, the principal contractor can monitor all material amounts processed by sub-contractors, as well as their schedules, and use the information to optimise the work sites to be as fluent and efficient as possible.

Reporting becomes easier when the required information can be accessed and distributed through one system, easily and reliably. In the same way, operators can monitor and analyse incoming and outgoing material quantities and mass balances.

Companies of all sizes can benefit from the opportunities provided by the collective system formed by scales and the Tamtron One Cloud. Since the scales send the weighing information to One Cloud automatically after weighing, the information remains up-to-date and available whenever needed, even through mobile devices.

Through the One Cloud, orders can be sent directly to the scales and their completion can be acknowledged on the scales. The fact that the weighing information is available in real time ensures that invoicing is possible immediately after weighing. Unlike with traditional receipts, the information will never be lost or delayed on the way.

INCREASE THE EFFICIENCY AND FLUENCY OF YOUR COMPANY'S OPERATIONS

SOLUTIONS TO SUPPORT YOUR BUSINESS

WEIGHING INFORMATION DIRECTLY INTO YOUR SYSTEM

ACCESS TO REALTIME WEIGHING INFORMATION

The weighing information collected from the scales is available in realtime via customer company's own ERP or invoicing system.

- ▶ **The weighing software can be integrated directly into the work machine's on-board computer**
- ▶ **The weighing information can be wirelessly directed to the customer's own ERP, TOS or other system**

The integration is always implemented in a customised manner to ensure an optimal fit to the customer's operating environment.

WEIGHING SOLUTIONS FOR CUSTOMER NEEDS

High-quality scale is the foundation for accurate and reliable weighing data. Tamtron's offering includes a wide range of type-approved, accurate, high-quality scales that can be installed to different applications regardless of make. Advanced and easy-to-use scales weigh during normal operations without interrupting or slowing down the workflow and Tamtron's weighing information management systems ensure real-time access to the weighing information, reports and operations monitoring.

Tamtron weighing solutions are available for forestry, construction and mining, waste and recycling, ports, process industry as well as transport and logistics. Our experts are always ready to help you find the perfect weighing information management solutions for your operations. Technical support is available for all of our information management systems.
