TAMTRON ONE POWER TRUCK ON-BOARD SCALE

Tamtron One Power Truck On-board Scale is mounted into a vehicle and makes it possible to weigh the load without any interruptions or additional processes. Approved for commercial use, One Power Truck On-Board scale is a very robust weighing solution that is capable to withstand the demanding conditions the vehicles are operating in.

TAMTRON ANV ON-BOARD CRANE SCALE

Approved for commercial use, the Tamtron ANV On-Board Crane Scale facilitates weight-based invoicing of waste and recycling materials, as materials can be weighed when emptying deep collection containers and other similar receptacles. ANV On-Board Crane Scale provides first-hand information about transport cycle times and transported quantities, which helps to optimize the routes.

TAMTRON RCV BIN LIFTER SCALE

Optimise waste collection with Tamtron RCV Bin Lifter Scale. Solution enables the tracking of individual bins and their weighing results in real-time. Approved for commercial use and equipped with vehicle-specific software and built-in video recording, Tamtron RCV Bin Lifter Scale streamlines the waste collecting workflows, making the route management, truck monitoring and verifying weighing results even more cost-efficient.

OUR OFFERING FOR RECYCLING INDUSTRY

With Tamtron weighing solutions and Digital services, you can streamline material flows, track and trace waste and improve invoicing and route planning.

With Tamtron digital services, companies can streamline material flows, track and trace waste and improve invoicing and route planning. With the help of intelligent cloud-based services, data is available in real-time throughout the organization and processes.

TAMTRON TRUCK SCALE AND PLATFORM SCALE

Tamtron Truck Scales are always designed with the customer's business and operating conditions in mind. Tamtron's Truck Scales are EU-type-approved for commercial use, so weighing results can be used as a basis for invoicing.

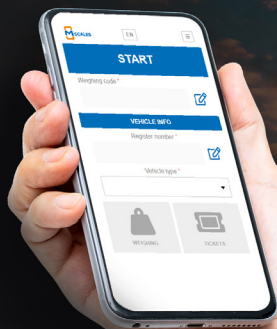

TAMTRON ONE POWER MATERIAL HANDLER SCALE

The Tamtron Power Material Handler Scale weighs material effortlessly while it is being moved, unloaded or loaded. The easy-to-use scale is designed for fast-paced material handling and can be used together with various lifting tools. As the One Power material handler scale is type-approved, invoicing can be carried out based on weighing results.

TAMTRON ONE POWER WHEEL LOADER SCALE

Tamtron One Power Wheel Loader Scale enables quick and efficient weighing while loading and moving materials with the wheel loader. The easy-to-use scale weighs the material during the lifting, making loading work faster and more efficient.

TAMTRON DIGITAL SERVICES

Tamtron Digital Services empowers businesses from all industries across the spectrum to operate more efficiently, safely and profitably by offering reliability, accuracy, and real-time insights. Weighing data serves as a cornerstone for critical processes, including material flow management, invoicing and operations management. Tamtron's Digital Services offer tools and insights to optimize, streamline and to facilitate these processes even smoother.

Tamtron mScales is a comprehensive turnkey solution designed to revolutionize industrial weighing processes and bring them into the digital era. It offers a seamless integration of all industrial scales, both old and new, into a unified digital grid. This grid covers all touchpoints

of the weighing process, from the initial weighing transaction to data storage, analysis, and regulation-compliant reporting. By connecting all scales to a secure and resilient cloud-based system, mScales ensures that weighing data is captured accurately, processed efficiently, and made readily available for analysis and reporting purposes.

WWW.TAMTRON.COM

Tamtron is a leading provider of advanced weighing and dosing technologies and digital services for optimising material flows. Tamtron's solutions help customers work more efficiently in more than 60 countries and in all major industries, including construction, mining, forestry, waste management and recycling, ports, transport and logistics, and process and manufacturing industries. Tamtron also provides customers with comprehensive life cycle services, including among others verification, calibration, maintenance, and spare parts services. Our quality is proven by ISO 9001:2015 quality certificate. Our scales are legal-for-trade type approved and our solutions for weighing data management can be utilised to support all company's primary process.

The company has two offices in Finland, one in Tampere and one in Lahti, and subsidiaries in eight European countries. Tamtron's solutions are also available through an international network of partners. The Tamtron Group employs approximately 270 people in nine countries, including Finland, Sweden, Norway, Denmark, Germany, the Czech Republic, Slovakia, Poland and Estonia.

In the financial period ending 31 December 2023, Tamtron's net sales amounted to EUR 54.9 million and the operating profit was EUR 2.5 million.
